

# Congratulations!

You've been invited to join us at Carleton University for cuHacking 2020!

## Information

**Where** Richcraft Hall at Carleton University  
**When** January 11 (9am) to January 12 (4pm)

At cuHacking 2020, you will help design, build, and present a project over the course of the weekend. At the end you will get to pitch your idea to a panel of judges for prizes.

Teams are limited to no more than four students. If you don't already have a team, there will be an opportunity to make new friends and form a team.

To be fair to everyone, teams can only start their hack once the event has officially begun. However, you can brainstorm and learn how to use the tools you plan to use before the event.

### What is a hackathon?

#### hack·a·thon

*A hackathon is best described as an "invention marathon". Anyone who has an interest in technology attends a hackathon to learn, build & share their creations over the course of a weekend in a relaxed and welcoming atmosphere.*

## What to Expect

### Food

Meals and snacks will be provided throughout the event for free.

### Networking

cuHacking 2020 is a perfect opportunity to learn more about the companies in the tech industry. Network with our sponsors to learn more about career paths in tech. Make sure to check our website for a list of our current sponsors.

### Games

Hackathons are more than just a competition. Be prepared for a variety of games, activities, and workshops throughout the event for more fun!

### Challenges

If you are stuck for ideas on what to program, we will be releasing hack themes on our social networks leading up to the event. Some of our sponsors will also be offering sponsored challenges. If you complete their challenge, you will be in the running for a sponsored prize (and a very good rep with our sponsors, they're hiring!)

## Participation Approval Request
